# About the Programme

The Post Graduate Programme in Technology and Business Management (PGP-TBM) at Masters' Union is a 16-month, full-time residential programme built on the principle of learning by doing. From the outset, students apply classroom concepts to real-world challenges. The programme balances academic rigor with industry integration by combining the expertise of full-time faculty with the insights of CXOs, startup founders, policymakers, and investors. About 40 percent of courses are taught by practitioners, while academics provide strong conceptual grounding through research-driven teaching. This dual approach ensures graduates leave with both solid theory and practical skills aligned with today's business landscape.

Alongside the flagship PGP-TBM, Masters' Union offers the Young Leaders Cohort (YLC), a 24-month programme for fresh graduates and early professionals with less than one year of experience. In addition to the core pedagogy, YLC includes a mandatory three-month internship at the end of the first year, ensuring early professional exposure while continuing academic and practical learning.

Learning outside the classroom is central to the Masters' Union pedagogy. Through the outclass programme, students take on structured challenges that simulate business environments. Through the Dropshipping and Creator Challenges, and the Venture Initiation Programme (VIP) startup journey, students gain entrepreneurial experience. Supported by Masters Union Investment Fund (MUIF), they learn venture creation, fundraising, and investment decision-making, emerging with practical skills to build and scale businesses.

Industry immersion is woven into every dimension of the programme. Students work on live projects with companies, presenting solutions to senior leaders. Industrial visits give practical exposure to supply chains, manufacturing, and media operations. Regular CXO sessions bring leaders from organisations including Morgan Stanley, Google, Reliance, Swiggy, and EY to campus.

Placement outcomes reflect this integrated model wherein the average CTC for recent cohorts has been around INR 33 LPA, with recruiters including BCG, Google, Goldman Sachs, Meta, DP World, Nestle, and Flipkart hiring across consulting, product management, finance, technology, and strategy.

In combining academic depth, entrepreneurial practice, and corporate immersion, Masters' Union is not just shaping careers but also contributing to the larger business and innovation landscape. The PGP programmes stand as a pathway for ambitious professionals who aspire to lead at the intersection of business, technology, and society.

# Post Graduate *Programme*

Tech & Business Management **2025-26**

## Aagrah Nigam

**Former Developer at TCS**
